Buying Shingles With a Blow Torch

Don't wait until the shingles are on your roof before you know how they resist fire, sun, time and weather. Know what they are made of before you buy.

Johns-Manville Flexstone Shingles are mineral through and through; made of asbestos rock fibre felt with an ornamental surfacing of crushed red, green or blue-black slate or feldspar (a neutral gray). They're literally sheets of flexible stone. That's why they stand the terrific heat of the blow torch test and afford greater fire protection, longer and more economical service—and never need painting.

That's why Flexstone Shingles are given Class "B" by Underwriters' Laboratories, Inc., the highest rating for this type of shingle; a rating that takes base rates of insurance.

Yet they cost little more than rag-felt shingles.

Know all about Flexstone Asbestos Shingles before you buy any other. Booklet, estimate or any further particulars on request. Write, call or telephone today.

Four Shingles in One

Guaranteed not to warp and to be fire proof, due to the asbestos base.

How to Be Rid of Dangerous Dandruff

If you have dandruff you must get rid of it quick—it's positively dangerous and will surely destroy your hair if you don't.

Dandruff heads mean faded, brittle, gray, scraggly hair that will not grow—then you are bald and nothing can help you.

The only sure way to abolish dandruff for good is to destroy the germ that causes it. To do this quickly, surely, and safely there is nothing as effective as Parisian sage, which you can get at any good druggists such as W. L. Gokay who guarantees it to keep away all dandruff, stop itching scalp and falling hair, and stimulate a new growth, or the cost, small as it is, will be refunded.

Parisian sage is a scientific preparation that supplies all hair needs—an antiseptic liquid, neither sticky or greasy, easy to use, and daintily performed.—Advertisement.

A GRAPHOPHONE, table, books, chair, vases and curtains all have a value in dollars and cents to you.

Probably you could replace them—but it would cost quite a sum.

Suppose they should burn tonight?

Home-Made Floor Oil.

One part boiled linseed oil thinned with three parts turpentine makes a good floor oil, says the Scientific American; while one part light, highly refined engine oil combined with four parts kerosene gives results similar to commercial kinds.

Freckle Face

Sun and Wind Bring Out Ugly Spots. How to Remove Easily.

Here's a chance, Miss Freckle-face, to try a remedy for freckles with the guarantee of a reliable concern that it will not cost you a penny unless it removes the freckles; while if it does give you a clear complexion the expense is trifling.

Simply get an ounce of Othine—double strength—from any druggist and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case.

Be sure to ask the druggist for the double strength Othine as this strength is sold under guarantee of money back if it fails to remove freckles.—Advertisement.
